DETAILED ACTION

Status of Claims

1. This action is in response to the amendment filed on 27 March 2006.
2. Claim 25 has been amended.
3. Claims 27-30 have been added.
4. Claims 1-3 and 5-30 have been examined.

Allowable Subject Matter

5. Claims 1-3 and 5-30 are allowed. See Reasons for Allowance under separate heading.

Reasons For Allowance

6. The following is an Examiner's statement of reasons for allowance:

None of the art of record, taken individually or combination, disclose at least the method step or system component of:

- *extracting a portion of a digital content file to be distributed to prepare a preview sample as an index to the digital content file for representing the digital content file;*
- *preparing a substantive file by encrypting the digital content file with a content key;*
- *preparing user specific authorization information by encrypting the content key based upon user information;*
- *preparing a user specific authorization information embedded preview sample by embedding the user specific authorization information, containing information for accessing the encrypted digital content file, as invisible information in the extracted preview sample;*

Art Unit: 3621

- *synthesizing the substantive file and the user-specific-authorization-information-embedded preview sample to prepare a synthesized digital content file;*

Independent Claims 1 and 25-30 are distinguished over the closest prior art of Stefik, which teaches embedding a watermark in a digital file that contains rights privileges (Abstract, column 12, lines 10-15). A review of entire Stefik reveals that Stefik discusses the "watermark data typically provides information relating to the owner of a document, the rights associated with that copy of the document and information relating to rendering event (e.g., when and where the document was printed). This information will typically aid in deterring or preventing unauthorized copying of the rendered work" (column 3, lines 22-39 and column 12, lines 10-51). However, Stefik fails to disclose or suggest other range of uses of watermark technology as well as location or integration of the watermark (see Stefik, column 10, line 66 to column 11, line 23). In other words, Stefik fails to disclose or suggest the claimed present invention's sample preview that has invisible authorization and index information for accessing the encrypted portion of the content.

Conclusion

7. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

"Digital Watermarking and Tracking" (Jan. 26, 1998) discloses a digital watermarking technology.
